Improve compliance  
in hand hygiene  
rules with SaniSign

The most effective step in reducing the spread of viruses is by stimulating the compliance in hand hygiene, especially since the outbreak of the Covid-19 virus.

### **Encourage hand hygiene rules with SaniSign**

The SaniSign, which touchless dispenses hygienic gel, has a Digital Signage screen in order to create extra attention value and can be installed in offices, restaurants, sports centers, airports, hospitals, public transport, etc. The SaniSign can be installed in all public places. You can indicate on the screen that customers, clients or staff must disinfect their hands before using products or enter stores, showrooms or buildings.

Apart from animated hand hygiene instructions there is the possibility to display eye-catching advertisements which can help you move towards economic recovery as well. With the RSS feed application there is the opportunity to inform about important announcements and public utility- or government messages.

### **Infrared sensor**

Automatic dosing via the built-in IR sensor, clean, safe and completely touch-free to prevent cross-contamination.

### **Reservoir**

Volume: 3000 ml - delivers 7500 pumps.

### **Digital Signage Software**

SaniSign Digital Signage Software offers pre-designed templates in where you can easily maintain your content. If you do wish to create your content, the editor is very user friendly and contains a rich set of drag and drop widgets such as dynamic slideshows, RSS feeds, HD videos, weather forecasts and more! No technical- or design skills required.

### **Wall bracket**

Mounting points make wall mounting an easy solution.

### **Customization**

It is also possible to customize the dispensers in the corporate style of your company with your logo and font.
